

Supply chain capability programme

Advanced Manufacturing
Research Centre

10th October 2017 AMRC, Sheffield

The AMRC is pleased to announce a new programme with Boeing Supplier Development.

The supply chain capability programme aims to:

- Give Boeing a better understanding of current and emerging capabilities within the UK high value manufacturing sectors.
- Give two way visibility of whether and where these capabilities might lead to potential opportunities, be it directly with Boeing or with suppliers at various tiers of our supply chain.
- Give companies a basic understanding of the requirements necessary to work with the Boeing Company.

All manufacturing companies are welcome and capabilities in a broad range of areas, including:

- **Processing of hard metals** – machining, forming, casting, powder metallurgy.
- **Composites** – manufacture, forming, curing, materials.
- **Special processes** – heat treatment, surface treatment, coatings.
- **Integrated Manufacturing** – automation, digital manufacturing.
- **Inspection and NDT.**

Come to the AMRC on 10th October to find out more about the programme and how to take part.
